

**FIND THE PICTURE GAME #1:** For 2 or more players. Pencil, paper, and dice will be needed. Your teacher will name one of the pictures on this page. The first student who touches the picture with their finger “wins” the picture and crosses it out. That student then rolls the dice. The number indicated on the dice is how many times the winning student names the picture or uses the word in sentences. It is also the number of points the winning student receives for finding that picture. Each player records the number of points earned on a piece of paper. Your teacher will name a new picture and play continues in this manner until all the pictures have been named and crossed out. The winner is the student with the most points.
